Rishit Goyal

Student at Parul University | Learning DSA in Java | HTML | CSS | JavaScript | AWS Cloud
Vadodara, Gujarat, India

Summary

I'm a second-year B.Tech student in Computer Science Engineering with a strong passion for software development, front-end development, database management, and problem-solving. I'm currently learning HTML, CSS, and JavaScript while building projects like Beagle (a shopping cart application) and an Instagram clone.

Simultaneously, I'm deepening my expertise in SQL and database normalization through Apna College and advancing my skills in Java, with a focus on Data Structures and Algorithms (DSA). These endeavors are laying the groundwork for mastering Spring Boot after completing my front-end journey.

In addition to academics, I had the privilege of being selected for the final round of the Smart India Hackathon (SIH) and recently won the IDEATHON at Parul University. These experiences have honed my ability to innovate and excel in collaborative environments.

I also manage projects on GitHub, gaining hands-on experience with version control and branching strategies. Always eager to collaborate and learn, I'm excited to connect with professionals in the tech industry and explore new opportunities.

Let's connect!

Education

Parul University

Bachelor of Technology - BTech, Artificial Intelligence · (August 2023)

Delhi Public School Surat

Grades 8th to 10th · (August 2021)

Bhagwan Mahavir University, Surat

Grades 11th & 12th · (May 2023)

The Millennium School Surat
Grades 3rd to 7th
